ENERGY GENERATOR The faucet's Self-Sustaining Power System features an energy-efficient turbine power option. The SSPS uses turbine technology to create and store power every time it is used. A magnetic dual-inductor rotor turbine creates energy from water flow. **Chicago Faucets Company** • www.chicagofaucets.com

WATER-SAVER Gooseneck models have been added to the EAF series of sensor-activated faucets with above-deck electronics. The new faucet models are easy to install and come with a 1.5 gpm/5.7 Lpm laminar stream pressure-compensating insert for health care applications.
