TIDY SOLUTION SofPull Mini bath tissue dispenser features a completely enclosed tissue roll to reduce cross contamination and has a center-pull nozzle for hygienic single-sheet dispensing. Because the tissue is enclosed, users only touch the available sheet, helping to reduce the spread of germs that might be found on standard bath tissue products. With its 9-inch size, it is perfect for areas with limited space. Single-sheet dispensing also helps cut consumption and avoid waste.

QUICK AND EFFECTIVE Peridox is a new sporicidal disinfectant that contains both hydrogen peroxide and peracetic acid and has been proven effective against methicillin-resistant *Staphylococcus aureus* and 45 other pathogens. It has a three-minute contact time and is safe for use on surfaces due to a proprietary blend of corrosion inhibitors. It cleans and disinfects nonporous surfaces against *Clostridium difficile* with 99.9999 percent effectiveness, according to the manufacturer.

BioMed Protect • www.biomedprotect.com

FAST ACTION Virasept is a ready-to-use hard-surface disinfectant that is EPA-approved for use against *Clostridium difficile* spores. Virasept's nonbleach chemistry works within 10 minutes of application against *C. difficile* spores and in four minutes or less against a broad spectrum of other pathogens. Its patented, noncorrosive chemistry is formulated for daily cleaning of high-touch surfaces without harming equipment or leaving a chalky residue.

Ecolab • www.ecolab.com

WIPE OUT Sani-Cloth Bleach wipes are designed for disinfecting high-risk areas endemic with *Clostridium difficile* spores and *Norovirus*. The stabilized dilution of sodium hypochlorite is tested effective against 50 microorganisms and has a contact time of four minutes. It is available in an extra-large canister, which contains an unfolded, ready-to-use 7.5-by-15-inch wipe.

SECURE TRANSPORT The 72S bulk linen truck features an optional, one-piece, rotomolded lid and door that shuts tightly, opens easily and remains safely in the opened position as needed. The unit is rotationally molded from 100 percent weatherproof, waterproof polyethylene and comes on top of a poly base and premium, industrial-strength casters.

Meese Orbitron Dunne Co. • www.modlaundry.com

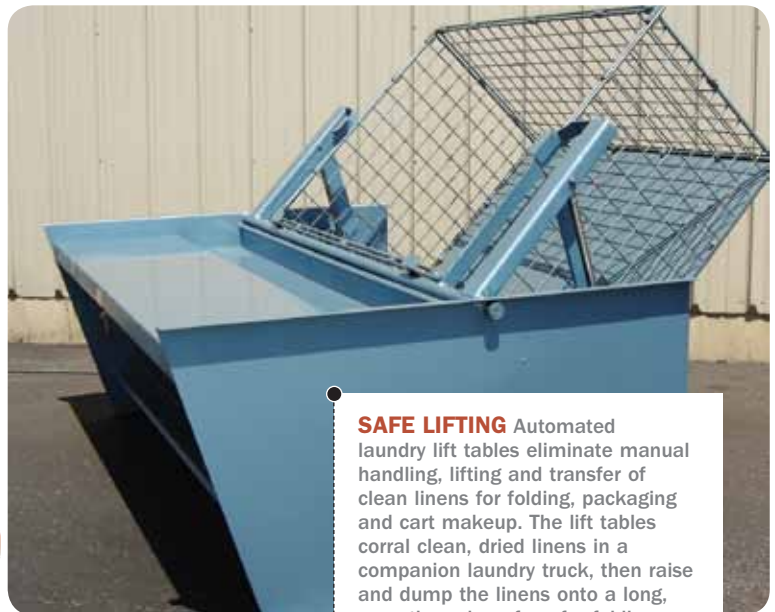

QUALITY CLEANING The company has expanded its touch-screen control to the high-speed V-series machines with 80-, 100-, 140- and 160-pound capacities. The rigid mount washer-extractors include USB ports for ease in transferring formulas, and advanced cylinder design for improved wash quality. The V-series consistently reaches high-speed extract, which removes moisture from each load to minimize dryer time and prolong linen life.

Milnor • www.milnor.com

AUTOMATED TRACKING The SlimFlex Laundry tag for automated tracking and inventory of hospital laundry, linens and supplies is the latest addition to the company's family of broadband UHF radio frequency identification transponders. The tag is made to withstand the chemical exposure and high temperatures of repeated commercial washing, drying and pressing cycles, as well as medical-grade sterilization procedures.

HID Global • www.hidglobal.com

SAFE LIFTING Automated laundry lift tables eliminate manual handling, lifting and transfer of clean linens for folding, packaging and cart makeup. The lift tables corral clean, dried linens in a companion laundry truck, then raise and dump the linens onto a long, smooth work surface for folding. Using compressed air, the entire process moves automatically and effortlessly at the flip of a switch.
