SILENCE IS GOLDEN The Quiet Suite of Von Duprin products provides quiet latches and sound-reducing exit devices. The line offers an alternative to magnetic solenoids that require high-voltage inrushes for traditional noisy electronic, motor-driven latch retraction. By incorporating an innovative, mechanical damper to decelerate push pads on the push-and-return stroke, most of the noise associated with push pad exit devices is eliminated.

GO WITH THE FLOW Interchangeability of components is a key benefit of the sensor-activated BASYS commercial faucet line. It is offered in multiple faucet body types and with three spray modules: low-flow multistream laminar (0.5 gpm) as well as full-stream aerated and laminar models (1.5 gpm). An optional integrated side mixer enables users to change water temperature, temporarily deactivate the faucet or allow water to flow continuously.

SMART CONTROL Using an intelligent gateway solution, the Rebel rooftop unit connects to the cloud to securely aggregate, filter and share data. The system will predict such faults as fan or motor failures, and dirty filters before they occur and can sync with the weather forecast to adjust for changing conditions.

CLEAN SOLUTION

The Hygen Disposable Microfiber System is designed and third-party tested to remove 99.9 percent of microbes, including *Clostridium difficile*. The disposable microfiber system also features built-in scrubbers that enable complete dirt removal without smearing. The microfiber mop can be used wet or dry.

Rubbermaid • www.rubbermaidcommercial.com

QUICK DRY The Jet Towel high-speed hand dryer uses two jets of air to dry hands in 10 seconds and is one of only a few on the market that capture excess water from users' hands. The device is quiet, with a noise level of 61 dB, and is up to 30 percent more efficient than other dryers in its class, while featuring air speed of 237 mph. Based on average electricity rates, the unit costs about \$25 per year to operate.
