

CABLE READY HD Video for Healthcare provides medical facilities a cost-effective way to upgrade to a feature-rich, extensive high-definition programming solution that is patient-friendly. The service, which interfaces with most bedside pillow speakers, provides video, free on-demand programming, an interactive program guide and the ability to pause live TV to hospitals, doctors' offices and long-term care facilities in certain regions of the country.

NEW AND IMPROVED The manufacturer's flagship building management system, Enterprise Buildings Integrator (EBI), has been updated to enable facility personnel to view and enhance core building technology with greater ease and precision. Version EBI R430 helps to improve efficiency and reduce energy and operational costs by simplifying setup, scheduling and control. New features include a more robust automation engine, comprehensive mobile access and a redesigned user interface.

TEMPERATURE CHECK The Centers for Disease Control and Prevention-compliant digital data logger can be used with the manufacturer's medical-grade refrigerators and freezers for the storage of vaccines and other critical pharmaceutical products. It records and stores temperature information at user-programmable intervals for continuous monitoring.

SECURE PRIVACY The 43211-CB Communicating Bathroom System provides power to operate most low-voltage locking mechanisms including maglocks, strikes and electrified locksets, and is ideal for use in a two-door restroom facility such as those located in health care facilities. Either of the "privacy" push buttons will energize door locks for both doors and illuminate the "occupied" high-intensity LED indicators outside the bathroom.

TESTED AND READY

TrueAlert ES intelligent notification devices bring addressable technology to systems that warn building occupants of fires or other emergencies. A self-testing feature sends a pass-fail signal to a Simplex 4100ES panel when audible and visible devices are tested. Testing is programmable.

SAFE SWEEP Intumescent door sweeps for both wood and metal doors can restore lost fire ratings without the substantial costs of structural modifications or door replacement. Model 339FS has been tested for 20-minute, fire-rated wood doors with undercuts up to 1.25 inches, and model 521FS carries a 90-minute rating based on testing with metal doors with undercuts up to 1.25 inches.

SUSTAINABLE PROTECTION

Wall protection is made from deTerra bio-based polymer, a sustainable alternative to PVC or petroleum-based materials, that significantly exceeds standard fire code. It outperforms PVC, ABS and PETG in fire tests and meets or exceeds mechanical performance tests relevant to wall protection.

SMART ANSWER The Fire-Finder XLS fire panel is ideal for high-rises, data centers, campuses and larger facilities. It can be networked and configured with optional voice evacuation and integrated smoke control functionality. Up to 300 custom messages can be programmed, with multiple messages able to play simultaneously. Events are color-coded by type, and keys are touch-sensitive.

WASHING UP The MWF-Series of suspended washers is available in 60-, 100-, 140- and 170-pound capacities. The RinSave water-saver software is standard. The series also features a four-point, dynamically tuned SmoothCoil suspension, which allows for a more compact design and reduces maintenance.

Pellerin Milnor Corp. • www.milnor.com

QUICK SPIN The IS275 275-pound washer-extractor features a high G-force extraction speed that removes more moisture from linens to reduce drying times. Installation is simplified because the unit doesn't need to be secured to a concrete foundation.
