

KITCHEN COMFORT High-performing, make-up air units provide an option for an integral air-cooled, packaged DX cooling system designed for kitchen applications. The system, available in 100 percent outside air and variable-volume airflow configurations, is designed to cool the make-up air to 70 to 75 degrees F for additional comfort. **Greenheck** • www.greenheck.com

MANAGING COMPLIANCE

Developed for affiliated outpatient health care facilities, the company's Affiliate Rx Waste Service addresses pharmaceutical waste compliance and offers assistance in managing the process. The service includes waste identification, staff training, Rx waste containers, labeling, transport and disposal.

SOLUTIONS » INTERIOR FINISHES

CREATIVE DESIGNS This solid-surface wall cladding and wainscoting is available in a variety of patterns and designs. In addition to smooth sheet, InPro Prism panels come in nine distinctive designs that are applied directly onto the Prism sheet to maintain nonporous integrity. Seaming caulks or grouts are not necessary.

COMFORT COLORS The new Essentials textile collection features linenlike textures, simple pattern motifs and a sophisticated color palette. The line offers tonalities that create surfaces that complement wood, stone and other natural interior elements. The collection ranges from bright, saturated colors to elegant neutrals. The textiles are suitable for drapery and privacy uses.
