

SEE THE WAY Architects and interior designers can create their own ceiling art from either original artwork or an original digital image with Ultima Create! ceiling panels. The design option makes it suitable for a wide range of health care applications. The panels also reduce noise and are easy to maintain. Custom colors for full-sized ceiling panels are available. **Armstrong** www.armstrong.com/ultimacreate

LOUD AND CLEAR The PT series two-way portable radios are small, lightweight and easy to hold and use. They feature narrow frequency channel steps for clearer communication with less interference. Nine programmable function buttons allow the device to be customized to particular application requirements. The FCC narrow band-compliant radios feature 255 channels with channel scan, priority scan and scan resume functions. **Ritron** • www.ritron.com

EASY OPERATION The newly designed B 80 W walk-behind scrubber features a compact, narrow design that makes it easy to maneuver. The tank's asymmetrical shape gives the operator a clear view of the brush head. The wastewater tank is cleansed by an automatic rinsing system without having the operator come into contact with the contents. **Kärcher** • www.karchercommercial.com

NOW HEAR THIS The Vocia 1.5 line includes new products for voice evacuation and public address systems. Among the new releases are the GPIO-1 general purpose input/output device to increase the number of logic or emergency inputs/outputs of a system for installations that require multiple fire panels. The TTS-1nc text-to-speech and middleware server with built-in software enables the automation and prioritization of critical paging messages from Rauland-Borg nurse call systems. **Biamp Systems** • www.biamp.com

SAFE CONNECTION

The expanded product line offers solutions for new and existing cables, pre- and post-drywall cables and focuses on increased cable capacity with easy re-penetration. The retrofit sleeve kit features oversized flanges for irregular and large openings and has an integrated smoke seal. The firestop sleeve kit comes with all parts needed to firestop new cable applications.

EMERGENCY ALERT

The IWSAlerts emergency mass notification system is a scalable and centralized platform that transforms an IP network into an enterprise-class, bidirectional, networkcentric system quickly and reliably. In real time, the system can alert personnel via a wide range of systems, including personal digital assistants, land line and mobile phone calls, email, social media, pagers, PA systems, fire alarms, indoor public address systems, digital displays and two-way radios.

INTEGRATED SYSTEM

The IntelliKnight 5820XL-EVS is a stand-alone system combining addressable fire alarm and emergency voice systems in one package. In addition to its fire protection benefits, the system offers a platform for sending real-time emergency communications. The large capacity makes it ideal for medium-to-large facilities that can benefit from installing the amplifiers where needed.

Silent Knight

FLEXIBLE FUNCTION Entellisys low-voltage switchgear offers emergency paralleling gear as well as normal distribution gear. The unit provides arc flash mitigation, reliability and flexibility over the life of the equipment by allowing the operator to monitor and control the gear from outside the arc flash boundary. The diagnostics make it easier for operators to identify potential issues before they arise. **GE Industrial Solutions** • www.geindustrialsolutions.com

SAFE CONNECTION A new line of medical-grade power strips are designed to supply power to medical equipment within the most critical areas of a health care facility. The devices are UL 60601-1, UL 60950-1 and UL 1363A compliant for the highest level of safety. The line also features surge-protective models that conform to UL 1449 third-edition requirements.

RELIABLE DELIVERY

Wiremold ULM series medical grade plug-in outlet centers are certified by TUV Rheinland as medical electrical devices and can be used in patient care areas in compliance with Article 517 of the National Electrical Code. The devices feature redundant bonding for a reliable grounding path and the aluminum housing helps to assure long service life.
