CALLISORTKL™

CallisonRTKL designed a new modernized clinic to replace the aging Ireland Army Community hospital after it became too large and dated to serve the current needs of the Fort Knox training base. The 101,373 square-foot **Ireland Army Health Clinic** was designed with the patient and family at the center and provides various outpatient services with improved quality and increased efficiency. With future flexibility integrated into the design, the new clinic is well-equipped to provide quality care to the Fort Knox community for many years to come.
